Re: Pressure Sensitive Tape Data Sheets:

Dear Valued Customer:

The following pressure sensitive tapes have no formal MSDS information: 3M Clear, No Glue Please, Duo-Tac, German Brown Liner Cloth, Sensi-Tack, Hi-Tack, Suprerstick, Extenda Bond, Extenda Bond Plus, Lace Front Support Tape, No-Shine, Proflex II, and Ultra Hold Tape. The above tapes are not considered a hazardous substance under OSHA's Hazard communication standard #29 CFR 1910.1200 as amended in the 8-24-87 federal register.

For a product to be considered a hazardous substance (requiring an MSDS sheet), the products must have shown statistically significant evidence, based on at least one study conducted in accordance with established principles, that acute or chronic health effects may occur if exposed to the product and/or present an otherwise significant health hazard.

Your concern for product safety is very much appreciated and if you have more questions or concerns, please contact us.
